

**QUALITY POLICY STATEMENT**

It is the intent of RESET to ship products that are defect free, functional in every way, and are delivered in a manner that meets or exceeds our customer's expectations, and to continually improve the effectiveness of the Quality Management System.

To that end, every employee is encouraged to be vigilant, and to report any situation, which might impair the quality of the units we ship.

We ask our customers to expect the best from us, and if not received, to make us aware. We understand that if you complain, or tell us of some service that was less than satisfactory, you are doing us a favor. We'll respond as such.

At RESET, meeting the customer expectations is not a goal, it is a requirement.

  
Galen Puccini, COO
